

## CASE STUDY

Agricultural Lagoon - HDPE geomembrane Liner

- ▼ **LOCATION:** Stony Mountain, MB
- ▼ **PROJECT TYPE:** Supply and Installation
- ▼ **PRODUCT USED:**  
60 mil single-sided textured HDPE geomembrane liner

### ▼ **PROBLEM:**

A rapidly growing agricultural operation required a lining solution for a manure containment lagoon.

### ▼ **THE TITAN SOLUTION:**

Titan recommended 60mil single-sided textured HDPE geomembrane as the lining solution for this project. Not only is this more economical than alternative above-ground containment options, but it is also faster to install and provides more storage capacity while respecting environmental guidelines. This solution also allowed for immediate use and easy expansion as operational requirements grow.

### ▼ **ACHIEVEMENT:**

Titan completed the job quickly and provided a solution that helped save the customer money and maximize operational efficiencies by eliminating wait time involved with alternate containment options.
