

PRESS RELEASE

CONCRETE CANVAS PATENT SUCCESS - EUROBENT'S SECOND (FINAL) APPEAL DISMISSED

15 APRIL 2020

In April 2018 a Polish court granted a preliminary injunction against Eurobent Sp.zo.o – the manufacturer of Tiltex™ (a cement/sand filled GCL product marketed as a GCCM*) – to refrain from infringement of Concrete Canvas Technology Ltd.'s patent PL/EP 2027319. The preliminary injunction has been final and binding since June 2018.

The decision was made by the Court of Appeal in Wroclaw on 31 January 2020 to dismiss Eurobent's appeal against the decision of the Regional Court in Legnica dated 4 November 2019, which dismissed Eurobent's previous motion for reversal of the final PI order. This decision is final and no further appeals are permitted.

The fine for non-compliance remains amongst the highest on record set by a Polish court for a case of this type.

Concrete Canvas wish to reiterate that they will robustly seek to enforce their intellectual property rights where they are being infringed by a manufacturer, distributor or otherwise. Patents exist to protect and encourage investment in innovation. It is in all of our interests to respect the law, including patent law.

ABOUT CONCRETE CANVAS

Concrete Canvas Ltd. was incorporated in the UK in 2005, it manufactures three award winning products, Concrete Canvas®, Concrete Canvas Shelters™ and CC Hydro™. These products were developed to exploit a unique material technology invented by Peter Brewin (MEng) and Will Crawford (MEng) whilst studying Industrial Design Engineering at Imperial College and the Royal College of Art in London.

Concrete Canvas Ltd's core material technology enables the supply of unique construction solutions that are extremely fast, easy to install and environmentally friendly. The company prides itself on innovation, quality and responsiveness to our customers' needs.

The primary markets for Concrete Canvas Ltd are in the civil infrastructure (road and rail), mining and petrochemical sectors where CC is used for erosion control applications such as channel lining, slope protection and bund lining. The company has grown rapidly since 2005 and has sold its products to over 80 countries around the world.
